Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A handheld electronic text and/or graphics presentation device including:

receiving means for receiving a card having a printed pattern encoding text and/or graphics of a plurality of pages of a document printed thereon; ~~the receiving means incorporating a roller mechanism arranged to retract the card into the device;~~

a window for observing a card received in said receiving means;

~~a card storage magazine for storing a plurality of said cards;~~

scanning means arranged to scan the printed pattern ~~as the card is retracted into the device by the roller mechanism;~~

user input control means;

processing means coupled to the scanning means, the programming means operatively programmed to generate a data signal corresponding to the text and/or graphics in response to a control signal from the user input control means; and

display means arranged to receive the data signal from the processing means and display the text and/or graphics as a corresponding plurality of digital pages.

2. (Original) An electronic text and/or graphics presentation device according to claim 1 including a foldable housing comprising first and second housing portions pivotal relative to each other.

3. (Original) An electronic text and/or graphics presentation device according to claim 2, wherein the first and second housing portions are each pivotally connected to a common spine.

4. (Original) An electronic text and/or graphics presentation device according to claim 3, wherein the spine includes a battery compartment.

5 - 7. (Cancelled).

8. (Currently Amended) An electronic text and/or graphics presentation device according to claim 72, wherein the first housing portion includes a said window for ~~observing a card retracted into the first portion.~~

9. - 10. (Cancelled).

11. (Original) An electronic text and/or graphics presentation device according to claim 2, wherein the display means comprises a flexible LCD screen located across inner surfaces of the first and second housing portions.

12. (Original) An electronic text and/or graphics presentation device according to claim 11, wherein the flexible LCD screen is bi-stable.

13. (Original) An electronic text and/or graphics presentation device according to claim 3, including a recess for receiving a loop of a flexible LCD screen upon pivoting the first and second housing portions to a closed position in order that creasing of the LCD screen is avoided.

14. (Original) An electronic text and/or graphics presentation device according to claim 2 wherein first and second printed circuit boards are located in the first and second housing portions respectively.

15. (Original) An electronic text and/or graphics presentation device according to claim 14, wherein the flexible LCD screen may include conductive traces coupling the first and second printed circuit boards to each other.

16. (Original) An electronic text and/or graphics presentation device according to claim 1, wherein the user input control means comprises a joystick assembly.

17. - 18. (Cancelled)
